About me

I'm interested in painting, drawing and design, which i believe adds to my creative side when programming.

I studied Multimedia Design and shortly after graduated as a Full Stack developer from the bootcamp Henry.

I'm more inclined to Frontend development. I strongly believe this is where I combine my creative side and background in design with my love for programming.

Education

Henry Bootcamp
FullStack Developer
Sep 2021 - Feb 2022
